The BioExcell™ Advantage

BioExcell™ offers premium serological pipettes with significant advantages in a variety of tip styles – standard, wide, and open-end – for transferring liquids and suspensions of different viscosities. All pipettes are virgin polystyrene, certified pyrogen-free and non-cytotoxic. Non-toxic color-coded cotton plugs provide easy size identification.

Sizes from 1 - 25 ml have unique smooth one-piece construction. There are no seams at the mouthpiece or tip ends, thus no possibility of sample hang-up or accidental breakage due to irregularities or weakness. One-piece construction also provides improved accuracy with calibration to deliver at $\pm 1.5\%$.

Sizes from 5 - 25 ml are two inches shorter than other typical pipettes, for ease of use under bench top hoods especially with pipette bulbs and controllers. In addition, new 5 ml and 10 ml "Shorty" pipettes now available are even shorter than the standard models, for ease of use in really tight spots. Open-end and wide-tip pipettes yield faster flow rates and reduce shearing for food, meat, cosmetics, oils, paint, sludge and cell-culture applications. The 1.1 ml and 2.2 ml bacteriological pipettes meet the A.P.H.A. standards for examination of dairy products.

PREMIUM PIPETTE ADVANTAGES

- Unique smooth one-piece construction eliminates sample hang-up and accidental breakage
- Standard 5 ml, 10 ml, and 25 ml pipettes are two inches shorter than most, for ease of use in bench top hoods, yet long and narrow enough to reach corners of all flasks
- New 5 ml and 10 ml "Shorties" are even shorter, for really tight spots
- Superior accuracy: $\pm 1.5\%$
- Selection of tip styles for samples of different viscosities and shear sensitivities
- Standard sterile packaging is one-side-paper one-side-plastic, static-free, easy-to open
- Standard, wide, and open-end tip styles to fit your needs
